INORGANICA CHIMICA ACTA VOLUME 222, NUMBERS 1–2, JULY 1994

# Contents

*Metals in Organic Chemistry II*

## Preliminary Communication

Palladium-assisted formation of carbon–carbon bonds
Part 2. Stoichiometric synthesis of spirocyclic compounds. X-ray structure of a $\pi$-allylic palladium intermediate .... 1
J. Vicente, J.-A. Abad, J. Gil-Rubio (Murcia, Spain) and P.G. Jones (Braunschweig, Germany)

## Articles

Spontaneous formation of a 1D-coordination polymer with helix structure starting from (*S*)-pyroglutamic acid and copper(II) acetate .... 5
R.W. Saalfrank, O. Struck (Erlangen, Germany), K. Peters and H.G. von Schnering (Stuttgart, Germany)

Cyclodimerisation and addition reactions of $Bu^tC{\equiv}P$ at a cobalt(I) centre .... 13
R.M. Matos, J.F. Nixon (Brighton, UK) and J. Okuda (Albany, NY, USA)

Formation of an allyl–tin bond in $\eta^3$-allyl(trichlorostannyl)palladium(II) complexes. .... 21
K. Hirako, Y. Miyamoto, K. Kakiuchi and H. Kurosawa (Osaka, Japan)

EXAFS studies of a chiral rhenium lactone complex and its precursors including multiple scattering calculations .... 27
T.S. Ertel, S. Hückmann, H. Bertagnolli (Stuttgart, Germany), G. Bringmann and O. Schupp (Würzburg, Germany)

Strain, silyl and steric effects on the regioselectivity of palladium(0) catalyzed allyl esters reduction as alternative to the Wittig reaction .... 37
J. Ollivier, P. Dorizon (Orsay, France), P.P. Piras (Orsay, France and Cagliari, Italy), A. de Meijere (Göttingen, Germany) and J. Salaün (Orsay, France)

Enantioselective synthesis of ferrocene analogs of hexestrol and estradiol; recognition towards estradiol receptors. .... 51
M. Gruselle, B. Malezieux (Paris, France), V.I. Sokolov and L.L. Troitskaya (Moscow, Russian Federation)

Synthesis and structure of $Cr(CO)_3$ complexes of biphenyl compounds with axial chirality. .... 63
M. Uemura, H. Nishimura, K. Kamikawa (Osaka, Japan) and M. Shiro (Tokyo, Japan)

Designed binaphthyl-derived titanium complexes: a new type of asymmetric catalyst for the carbonyl-ene reaction with glyoxylate .... 71
K. Mikami, Y. Motoyama and M. Terada (Tokyo, Japan)

Carbonyl carbene coupling on cationic $\eta^2$-carbene complexes of molybdenum and tungsten. .... 77
C. Ogric, J. Ostermeier, M. Heckel, W. Hiller and F.R. Kreißl (Garching, Germany)

A comparison of catalytic activity for imine hydrogenation using Ru ditertiary phosphine complexes, including chiral systems .... 85
D.E. Fogg, B.R. James (Vancouver, BC, Canada) and M. Kilner (Durham, UK)

Uranium compounds as catalysts for aldolisation reactions. .... 91
P. Van de Weghe, J. Collin (Orsay, France) and I. Santos (Sacavém, Portugal)

The preparation of chiral titanium reagents: a comparison of new and known ligands .... 95
R.O. Duthaler (Basle, Switzerland), A. Hafner (Marly, Switzerland), P.L. Alsters, G. Bold, G. Rihs, P. Rothe-Streit and B. Wyss (Basle, Switzerland)

Oxidation of *cis*- and *trans*-pinane with $RuO_4$ generated *in situ*. .... 115
J.-L. Coudret and B. Waegell (Marseille, France)

Conversion of cationic phosphite complexes into phosphonate complexes with selective deamination on the coordinating phosphorus. Reaction of $[(\eta^5\text{-}C_5H_5)L_2Fe\{P(NC_4H_8)_n(OMe)_{3-n}\}]^+$ (L = CO, $PMe_3$) with KOH to afford $(\eta^5\text{-}C_5H_5)L_2Fe\{P(O)(NC_4H_8)_{n-1}(OMe)_{3-n}\}$. .... 123
H. Nakazawa, K. Kubo, K. Tanisaki, K. Kawamura and K. Miyoshi (Higashi-Hiroshima, Japan)

Catalytic hydrosilylation of carbon monoxide with cobalt carbonyls .... 131
A. Sisak, L. Markó, Z. Angyalosy and F. Ungváry (Veszprém, Hungary)

Addition of carbanions to tris(trimethylphosphine)(cyclooctadiene)iridium(I) chloride: three different modes of reaction depending on the nature of the carbanion. .... 135
J.F. Frazier, F.E. Anderson, R. Clark and J.S. Merola (Blacksburg, VA, USA)

Elsevier Science S.A.

Carbon dioxide fixation by $Cp_2(\eta^3$-allyl)Ti complexes generated from various dienes . . . . . 145
Y. Gao, S. Iijima, H. Urabe and F. Sato (Yokohama, Japan)

Selective transformations of alkynols catalyzed by ruthenium complexes . . . . . 155
C. Bruneau, Z. Kabouche, M. Neveux, B. Seiller and P.H. Dixneuf (Rennes, France)

The effects of counterion and solvent on the reactivity of nickel acylate complexes . . . . . 165
M.J.T. La Duca, J.L. Simunic (Cincinnati, OH, USA), J.W. Hershberger (Oxford, OH, USA) and A.R. Pinhas (Cincinnati, OH, USA)

Intermediates in the palladium-catalysed reaction of 1,3-dienes
Part 8. The reaction of palladium–butadiene complexes with ethyl methylacetoacetate . . . . . 179
A. Döhring, R. Goddard, G. Hopp, P.W. Jolly, N. Kokel and C. Krüger (Mülheim a.d. Ruhr, Germany)

Synthesis of stable tail-to-tail-conjugated primary enamines containing hetarene substituents . . . . . 193
D. Wingbermühle, C. Sarter and G. Erker (Münster, Germany)

Insertion of NH into the rhenium–carbon bonds of a Fischer-type rhenacyclobutadiene. Preparation and characterization of azarhenacyclic complexes . . . . . 199
V. Plantevin, J. C. Gallucci and A. Wojcicki (Columbus, OH, USA)

Steric and electronic tuning of Michael addition reactions induced by pentacarbonyl metal fragments. . . . . 207
R. Pipoh and R. van Eldik (Witten, Germany)

Synthesis and structure of new chiral ferrocenylphosphines for asymmetric catalysis . . . . . 213
A. Togni, C. Breutel, M.C. Soares, N. Zanetti, T. Gerfin, V. Gramlich (Zurich, Switzerland), F. Spindler and G. Rihs (Basle, Switzerland)

Hydration of conjugated dienes to produce ketones catalyzed by ruthenium complexes. . . . . 225
F. Stunnenberg, F.G.M. Niele and E. Drent (Amsterdam, Netherlands)

The development of a quinone $\alpha$-anion synthon. Utilization of a maleoylcobalt complex as a quinone surrogate and a dominant role for ligand effects. . . . . 235
C.F. Jewell, Jr. and L.S. Liebeskind (Atlanta, GA, USA)

The influence of aluminum trichloride on a configuratively labile lactone-bridged biaryl: quantum chemical calculations and optical spectroscopy. . . . . 247
G. Bringmann, U. Dauer, O. Schupp, M. Lankers, J. Popp, U. Posset, A. Weippert and W. Kiefer (Würzburg, Germany)

Synthesis, structure, dynamics and first atropisomer-selective cleavage of the chromium tricarbonyl complex of a lactone-bridged biaryl . . . . . 255
G. Bringmann, L. Göbel (Würzburg, Germany), K. Peters, E.-M. Peters and H.G. von Schnering (Stuttgart, Germany)

Synthesis of $\alpha$-hydroxy acid derivatives by the photochemical reaction of *O*-silylchromium(0) carbene complexes and nucleophiles . . . . . 261
B. Alcaide, L. Casarrubios, G. Domínguez and M.A. Sierra (Madrid, Spain)

Reactions of $[Au(C_6F_5)(SC_4H_8)]$ with diazoalkanes. Synthesis and molecular structures of $[\overline{Au(C_6F_5)(Ph_2C{=}N}{-}N{=}CPh_2)]$ . . . . . 267
S. Bordoni, L. Busetto, M.C. Cassani, V.G. Albano and P. Sabatino (Bologna, Italy)

A novel reaction of the cyano ligand opening an organometallic route to 4-amino imidazoles: four component condensation (4CC) with isocyanide, aldehyde and amine. . . . . 275
D. Rieger, S.D. Lotz, U. Kernbach, S. Schröder, C. André and W.P. Fehlhammer (Berlin, Germany)

Manganese and tungsten carbene complex mediated intramolecular Diels–Alder reactions. . . . . 291
K.H. Dötz, D. Böttcher and M. Jendro (Bonn, Germany and Marburg, Germany)

Arene migration in ruthenium clusters: a kinetic study of the isomerisation of $Ru_5C(CO)_{12}(\mu_3\text{-}\eta^2\text{:}\eta^2\text{:}\eta^2\text{-}C_6H_6)$ to $Ru_5C(CO)_{12}(\eta^6\text{-}C_6H_6)$ . . . . . 299
P.J. Dyson, B.F.G. Johnson (Edinburgh, UK) and D. Braga (Bologna, Italy)

Nitrosoarene and nitrosoalkane insertion reactions of titanacyclobutenes . . . . . 305
K.M. Doxsee, J.J.J. Juliette, T.J.R. Weakley and K. Zientara (Eugene, OR, USA)

Alkyne hydration using Pt(II) catalysts . . . . . 317
P.W. Jennings, J.W. Hartman and W.C. Hiscox (Bozeman, MT, USA)

Use of aluminium as an electron pool. Reductive coupling of iodobenzenes promoted by electron transfer in an Ni/Pb/Al multi redox system . . . . . 323
H. Tanaka, S. Sumida, N. Kobayashi, N. Komatsu and S. Torii (Okayama, Japan)

Reactions of aziridine with platinum(II) nitriles. Formation of (aziridino)amidines and 2-imidazolines and X-ray structure of *trans*-$[PtCl_2\{N(H)=C(Ph)NCH_2CH_2\}_2]$ . . . . . 327
R.A. Michelin, M. Mozzon, R. Bertani, F. Benetollo (Padua, Italy), G. Bombieri (Milan, Italy) and R.J. Angelici (Ames, IA, USA)

Synthesis, structure and solid state polymerization of diaquabis(propynoato)magnesium. . . . . 339
C.B. Case and B.M. Foxman (Waltham, MA, USA)

Reaction of primary silanes with dinuclear rhodium hydride complexes: silane coupling reactions. . . . . 345
M.D. Fryzuk, L. Rosenberg and S.J. Rettig (Vancouver, BC, Canada)

Magnesium bromide in Grignard reagent formation . . . . . 365
J.F. Garst, K.E. Lawrence, R. Batlaw, J.R. Boone and F. Ungváry (Athens, GA, USA)

An europium(III) complex as an efficient catalyst for the Michael reaction of $\alpha,\beta$-enones with ketene silyl acetals: LIS-NMR analysis for the transition state through complexation between europium(III) catalyst and enones . . . . . 377
M. Terada, T. Nakai and K. Mikami (Tokyo, Japan)

**Note**

Palladium complex catalysed synthesis of sulfinic acids, sulfinic acid esters, sulfonic acids and *S*-alkyl alkanethiosulfonates. . . . . 381
J. Herwig and W. Keim (Aachen, Germany)

Conference Calendar . . . . . 387

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.
